JEPPESEN MARINE RE-LAUNCHES POPULAR PASSPORT CHARTS WITH HIGH QUALITY C-MAP VECTOR CHART DATA

**New World Folio 39 Release for Users of Nobeltec VNS & Admiral Versions 7.0-9.3, Also
Compatible With Northstar 972 Chart Plotter and Simrad GB60 Glass Bridge System**

PORTLAND, ORE. August 7, 2008 — Jeppesen Marine today announced the release of Passport Charts World Folio 39, the first Passport Charts utilizing advanced C-Map vector chart data. This new product launch also reinstates the ability for boaters to buy Passport Chart regions for any location around the world.

This launch is big news for boaters using Passport Charts in conjunction with Jeppesen Marine's popular navigation software Nobeltec Visual Navigation Suite (VNS) and Nobeltec Admiral Versions 7.0 through 9.3. New Passport Charts with C-Map data were developed for exclusive use with these Nobeltec products. Jeppesen Marine's reformulation of these charts using C-Map vector chart data ensures that boaters who navigate with these popular products can rely on the highest level of detail and accuracy. This new Passport product, of which the first release will be World Folio 39, contains approximately the same worldwide coverage areas and chart regions as previous World Folio releases.

These World Folio 39 Passport Charts also are available to owners of two advanced navigation systems that rely on Passport data — the Northstar 972 chart plotter and the Simrad GB60 Glass Bridge System.

World Folio 39 Passport Charts are available through all the convenient sales channels that dealers and customers have come to expect. Boaters can still purchase Passport World Folio and Passport Deluxe data products through their authorized Nobeltec dealers. These products also are available for sale on the Nobeltec.com web store, www.nobeltec.com, or by contacting the Jeppesen Marine sales team.

To learn more about new World Folio 39 Passport Charts with the added quality, detail and accuracy of C-Map vector chart data, contact Jeppesen Marine headquarters toll-free at (800) 946-2877; direct at +1 503 579 1414 or visit online at www.nobeltec.com.

Jeppesen Marine is a market-leading provider of digital navigation solutions, based on worldwide vector chart data type approved to ISO19379, meteorological information and transmission technologies. Through its wide range of products and services, Jeppesen Marine serves numerous markets from light marine, to today's safety-conscious commercial shipping industry operating on the inland/coastal waterways as well as high seas. Jeppesen Marine is chartered with the same underlying values that launched Jeppesen in 1934 – improving safety and efficiency through innovative navigation solutions.

For more than 70 years Jeppesen has made it possible for pilots and their passengers to safely and efficiently reach their destinations. Today this pioneering spirit continues as Jeppesen delivers essential information and optimization solutions to improve the efficiency of air, sea and rail operations around the globe. Jeppesen is a subsidiary of Boeing Commercial Aviation Services, a unit of Boeing Commercial Airplanes. Jeppesen corporate information is available online at www.jeppesen.com.
